EDUCATION

Master of Technology

Artificial Intelligence and Machine Learning
BITS Pilani

2026 - 2028 (Currently Pursuing)

Bachelor of Technology

Computer Science and Engineering (AI & ML)
K.R. Mangalam University

2021 - 2025 | GPA 8.5/10

SKILLS

Languages

Python • C++ • SQL • R

ML & Frameworks

TensorFlow • PyTorch • Scikit-learn • OpenCV • FastAPI

AI / GenAI

LLMs • Agentic AI • RAG • Transformers • NLP • Prompt Engineering • Hugging Face • BERT

Agent Frameworks

LangChain • LangGraph • LangSmith

MLOps & Deployment

Docker • Kubernetes • CI/CD • MLflow • Model Serving • Git • FAISS/Chroma

Cloud & Data

AWS • GCP (Vertex AI) • MySQL • MongoDB • Pandas • NumPy • Power BI

CERTIFICATIONS

Data Science Professional – Ducat India

Python, statistics, ML & predictive modeling

AI/ML for Geodata Analysis – ISRO

Applying AI/ML to geospatial data analysis

PROFESSIONAL SUMMARY

Machine Learning Engineer with 1+ year of experience architecting production-grade AI systems, high-throughput model-serving platforms, and event-driven applications. Proven track record of leading technical initiatives, designing low-latency services at enterprise scale, and delivering measurable business impact through ML engineering and AI-driven automation. Outside of work, a competitive tennis player and avid sketch artist, pursuits that sharpen discipline, focus, and creativity.

WORK EXPERIENCE

Research Associate – AI

Keywords Studios India

May 2025 - Present • Gurugram, Haryana

- Trained and optimized enterprise-grade Agentic AI models to autonomously execute complex multi-step workflows (flight booking, e-commerce ordering, web data retrieval), improving task-completion reliability.
- Trained and refined an agentic browser-automation AI that autonomously navigates websites and completes real-world tasks on a user's behalf, delivering polished, client-ready model iterations that improved action accuracy and reliability.
- Built custom data pipelines and delivered 85% of self-generated training datasets directly to production as the first member of a global team.
- Deployed and monitored production ML models with Docker, MLflow, and CI/CD automation, cutting model release cycles by 40%.
- Awarded “Rookie of the Year 2025” for surpassing all performance KPIs.

Artificial Intelligence Intern

Infosys

November 2024 - February 2025 • Remote

- Engineered an AI call-center system with LangChain and LangSmith, boosting model response accuracy by 35% and elevating customer-AI interaction quality.
- Developed and deployed LLM features that reduced system latency by 25%, streamlining the model deployment process.
- Designed and A/B-tested prompt-engineering strategies with automated LangSmith evaluation, reducing hallucinations by 20%.

PROJECTS

Dynamic Screen Companion

- Built a real-time multi-modal assistant integrating the Gemini API and a high-performance FastAPI backend; optimized OCR pipelines to 95%+ accuracy, reducing manual task time by 40%.

Diabetic Optiscan

- Led a Vision Transformer (ViT-B/16) model on the APTOS dataset with a custom wavelet technique that boosted detection precision by 50%; co-authored a peer-reviewed paper.

Currency Detection App for Visually Impaired

- Trained an image-classification model on 200,000+ banknote images achieving 96% accuracy, deployed in a mobile app with voice feedback to help prevent fraud.
