PROFESSIONAL SUMMARY

Machine Learning Engineer with 1.5+ years of experience building and shipping ML systems using LLMs, Agentic AI, and computer vision. As a Research Associate, AI at Keywords Studios, I train AI agents and build the data pipelines behind them, and was named "Rookie of the Year 2025" for beating every performance KPI. I am pursuing an M.Tech in AI and ML at BITS Pilani and have co-authored a peer-reviewed research paper. Outside work, I am a marathon runner and bring that same discipline and consistency to everything I build.

EDUCATION

Birla Institute of Technology and Science, Pilani (BITS Pilani) July 2026 – July 2028

M.Tech in Artificial Intelligence and Machine Learning (Currently Pursuing)

Relevant Coursework: NLP, Deep Learning, Generative AI, LLMs, Deep Neural Networks, Deep Reinforcement Learning

K.R. Mangalam University July 2021 – July 2025

B.Tech in Computer Science and Engineering (Specialization in AI/ML), Gurgaon | CGPA: 8.5/10

EXPERIENCE

Research Associate – AI, Keywords Studios India – Gurgaon, Haryana May 2025 – Present

- Named "**Rookie of the Year 2025**" for beating **every performance KPI** across model training, data pipelines, and teamwork.
- Train and improve **Agentic AI models** that complete tasks with many steps on their own, like booking flights, placing online orders, and collecting data from websites, making them **more reliable** at finishing each task.
- Helped build a **web automation AI agent** that reads the screen, follows a plain English instruction, and clicks, types, and navigates websites by itself. Tested it with a **global team** to raise its **action accuracy** before each client release.
- As the first member of a global team, built custom data pipelines and delivered **85% of the training data I created straight to production**, helping models get ready faster.

Artificial Intelligence Intern, Infosys – Remote November 2024 – February 2025

- Built an **AI call center system** with **LangChain** and **LangSmith** that improved answer accuracy by **35%**, and deployed LLM features that cut system latency by **25%**.
- Compared prompt designs using A/B tests and automated LangSmith evaluation, and reduced **hallucinations (false answers)** by **20%**, so customer conversations felt more natural and trustworthy.
- Worked with **12 engineers** on full ML workflows and was selected to present at the **Best Project by Indian Interns** initiative.

Data Analytics & ML Intern, QL2 Software – Gurgaon, Haryana June 2024 – August 2024

- Developed **predictive ML models** for competitive pricing and automated the data collection behind them.

PROJECTS

Dynamic Screen Companion June 2025 – Present

- Built a **multimodal AI assistant** with the **Gemini API** that watches the screen in real time and gives continuous voice feedback.
- Created a **FastAPI** model serving backend that handles many inference requests at the same time, cutting manual task time by **40%**.
- Designed the system from scratch and tuned the OCR pipeline to keep **95%+ text extraction accuracy** on varied screen layouts.

Diabetic Optiscan January 2025 – June 2025

- Built an AI tool that scans eye (retina) images to find early signs of **diabetic retinopathy**, and co-authored a **peer-reviewed research paper** on how it works and the accuracy it achieved.
- Fine-tuned a **Vision Transformer (ViT-B/16)** on the APTOS dataset and designed a custom wavelet technique that improved **detection precision by 50%** over older methods.

Currency Detection App for Visually Impaired July 2024 – December 2024

- Trained an image classification model on **200,000+ banknote images** with **96% accuracy** and put it in a mobile app with voice feedback to help prevent fraud.
- Ran **interviews with visually impaired users** to improve the app's accessibility features for everyday use.

SKILLS

Languages & Frameworks: Python, C++, SQL, OOP, DSA, PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, LangChain, LangGraph
AI & Machine Learning: LLMs, Generative AI, Agentic AI, RAG, Fine-tuning (LoRA, QLoRA), Deep Learning, Computer Vision, Transformers, BERT, NLP, Prompt Engineering, Vector Databases (FAISS/Chroma), Model Evaluation & Optimization
MLOps & Deployment: Docker, Kubernetes, CI/CD, MLflow, Git, FastAPI, Model Serving, Model Monitoring, Data Pipelines
Data & Cloud Tools: AWS, GCP (Vertex AI), MySQL, MongoDB, Pandas, NumPy, Statistical Analysis

CERTIFICATIONS

Ducat India – Data Science Professional Training April 2024 – April 2025

Professional training in Data Science: Python, statistics, machine learning, data analysis, and predictive modeling.

AI/ML for Geodata Analysis – ISRO

Applied ML and deep learning to satellite and remote sensing imagery for terrain classification and geospatial pattern analysis.
