PROFESSIONAL SUMMARY

Data Scientist with 1+ year of experience turning data into business impact through statistical modeling, machine learning, and predictive analytics. Skilled in Python, R, SQL, statistical inference, feature engineering, and end-to-end model development — from exploratory data analysis and hypothesis testing to deploying production models — with a peer-reviewed publication in deep learning. Outside of work, a competitive tennis player and avid sketch artist, pursuits that sharpen discipline, focus, and creativity.

EDUCATION

Birla Institute of Technology and Science, Pilani (BITS Pilani)	July 2026 – July 2028
M.Tech in Artificial Intelligence and Machine Learning (Currently Pursuing)	
Relevant Coursework: NLP, Deep Learning, Generative AI, LLMs, Deep Neural Networks, Deep Reinforcement Learning	
K.R. Mangalam University	July 2021 – July 2025
B.Tech in Computer Science and Engineering (Specialization in AI/ML), Gurgaon	

EXPERIENCE

Research Associate – AI, Keywords Studios India – Gurgaon, Haryana	May 2025 – Present
- Awarded “Rookie of the Year 2025” for surpassing all performance KPIs through advanced modeling, data-pipeline optimization, and cross-functional collaboration. - Trained and evaluated Agentic AI models for complex multi-step workflows, using data-driven experimentation and error analysis to improve task-completion reliability. - Contributed to a web-automation AI agent that visually interprets on-screen content and autonomously plans and executes multi-step browser actions from natural-language instructions. - Trained, evaluated, and quality-controlled the agent with a global team, curating datasets and running structured, metric-driven test reviews to improve action accuracy and reliability. - Designed and delivered 85% of self-generated training datasets to production as the first member of a global team, applying rigorous data quality checks and statistical validation.	
Artificial Intelligence Intern, Infosys – Remote	November 2024 – February 2025
- Analyzed conversational datasets and engineered features that boosted AI response accuracy by 35% using LangChain and LangSmith. - Built and validated LLM-driven features that reduced system latency by 25%, quantifying impact with clear performance metrics and dashboards. - Designed and A/B-tested prompt-engineering strategies with automated LangSmith evaluation, reducing hallucinations by 20% through statistical comparison of variants. - Collaborated with 12 engineers on end-to-end ML workflows and was selected to present at the Best Project by Indian Interns initiative.	

PROJECTS

Dynamic Screen Companion	June 2025 – Present
- Built a real-time multi-modal assistant integrating the Gemini API to analyze live screen activity and deliver continuous, context-aware feedback. - Engineered the end-to-end data and inference pipeline from scratch, reducing manual task time by 40%. - Optimized OCR pipelines to sustain 95%+ extraction accuracy across varied screen layouts.	
Diabetic Optiscan	January 2025 – June 2025
- Built an AI tool that scans retinal (eye) images to detect early signs of diabetic retinopathy, and co-authored a peer-reviewed research paper detailing the methodology and performance results. - Led integration of a Vision Transformer (ViT-B/16) on the APTOS dataset, applying statistical analysis of self-attention to capture spatial patterns in retinal images. - Designed a custom wavelet technique that boosted detection precision by 50% over legacy methods.	
Currency Detection App for Visually Impaired	July 2024 – December 2024
- Trained an image-classification model on 200,000+ banknote images achieving 96% accuracy, validated through rigorous evaluation across edge cases. - Conducted user interviews with visually impaired individuals to ground feature decisions in real-world needs.	

SKILLS

Languages & Tools: Python, R, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Jupyter, Git
Statistics & ML: Statistical Modeling, Hypothesis Testing, A/B Testing, Regression, Classification, Clustering, Feature Engineering, Predictive Modeling, Time Series, Model Evaluation & Optimization
Data & Visualization: Data Wrangling, EDA, Power BI, Matplotlib, Seaborn, MySQL, MongoDB, Excel, Statistical Analysis, Experiment Design
AI & Cloud: LLMs, Generative AI, RAG, Deep Learning, NLP, Computer Vision, AWS, GCP (Vertex AI)

CERTIFICATIONS

Ducat India – Data Science Professional Training	April 2024 – April 2025
Professional training in Data Science: Python, statistics, machine learning, data analysis, and predictive modeling.	
AI/ML for Geodata Analysis – ISRO	
Applied ML and deep learning to satellite and remote-sensing imagery for terrain classification and geospatial pattern analysis.
