PROFESSIONAL SUMMARY

Machine Learning Engineer with 1+ year of experience architecting production-grade AI systems, high-throughput model-serving platforms, and event-driven applications. Proven track record of leading technical initiatives, designing low-latency services at enterprise scale, and delivering measurable business impact through ML engineering and AI-driven automation. Outside of work, a competitive tennis player and avid sketch artist, pursuits that sharpen discipline, focus, and creativity.

EDUCATION

BITS Pilani M.Tech in Artificial Intelligence and Machine Learning (Currently Pursuing)	July 2026 – July 2028
K.R. Mangalam University B.Tech in Computer Science and Engineering (Specialization in AI/ML), Gurgaon <i>Relevant Coursework: Data Structures & Algorithms, NLP, Computer Vision, DBMS, Machine Learning, Deep Learning</i>	July 2021 – July 2025

EXPERIENCE

Research Associate – AI, Keywords Studios India – Gurgaon, Haryana - Trained and optimized enterprise-grade Agentic AI models to autonomously execute complex multi-step workflows (flight booking, e-commerce ordering, web data retrieval), improving task-completion reliability. - Built custom data pipelines and delivered 85% of self-generated training datasets directly to production as the first member of a global team, accelerating model readiness. - Fine-tuned large language models using LoRA/QLoRA and RAG pipelines, improving domain-specific response accuracy by 30% while reducing inference costs across enterprise workloads. - Deployed and monitored production ML models with Docker, MLflow, and CI/CD automation, cutting model release cycles by 40% and ensuring reproducible, reliable deployments. - Awarded “Rookie of the Year 2025” for surpassing all performance KPIs through advanced model training, data-pipeline optimization, and cross-functional collaboration.	May 2025 – Present
Artificial Intelligence Intern, Infosys – Remote - Engineered an AI call-center system with LangChain and LangSmith, boosting model response accuracy by 35% and elevating customer-AI interaction quality. - Developed and deployed LLM features that reduced system latency by 25%, streamlining the model deployment process. - Designed and A/B-tested prompt-engineering strategies with automated LangSmith evaluation, reducing hallucinations by 20% and making customer conversations feel more natural and trustworthy. - Collaborated with a team of 12 engineers to integrate end-to-end ML workflows and earned selection to present at the Best Project by Indian Interns initiative.	November 2024 – February 2025

PROJECTS

Dynamic Screen Companion - Built a real-time multi-modal assistant integrating the Gemini API to analyze live screen activity and deliver continuous voice feedback and interactive support. - Engineered a high-performance FastAPI model-serving backend handling concurrent inference streams, reducing manual task time by 40%. - Designed the end-to-end multi-modal architecture from scratch and optimized OCR pipelines to maintain 95%+ extraction accuracy across varied screen layouts.	June 2025 – Present
Diabetic Optiscan - Led integration of a Vision Transformer (ViT-B/16) model on the APTOS dataset, optimizing self-attention to capture complex spatial patterns in high-resolution retinal images. - Designed a custom wavelet modification technique that boosted detection precision by 50% over legacy methods. - Co-authored a peer-reviewed research paper detailing the system architecture and performance breakthroughs.	January 2025 – June 2025
Currency Detection App for Visually Impaired - Trained an image-classification model on 200,000+ banknote images achieving 96% accuracy, deployed in a mobile app with voice feedback to help prevent fraud. - Conducted user interviews with visually impaired individuals to refine real-world accessibility features.	July 2024 – December 2024

SKILLS

Languages & Frameworks	Python, C++, SQL, R, FastAPI, TensorFlow, PyTorch, OpenCV, Scikit-learn, LangChain, LangGraph
AI & Machine Learning	LLMs, Generative AI, Agentic AI, RAG, Fine-tuning (LoRA, QLoRA), Deep Learning, Transformers, Hugging Face, BERT, NLP, Prompt Engineering, Model Evaluation & Optimization, OOP, DSA
MLOps & Deployment	Docker, Kubernetes, CI/CD, MLflow, Model Serving, Model Monitoring, Data Pipelines, Git, Vector Databases (FAISS/Chroma)
Data & Cloud Tools	AWS, GCP (Vertex AI), Power BI, MySQL, MongoDB, Pandas, NumPy, Statistical Analysis

CERTIFICATIONS

Ducat India – Data Science Professional Training Professional training in Data Science: Python, statistics, machine learning, data analysis, and predictive modeling. AI/ML for Geodata Analysis Offered by ISRO (Indian Space Research Organisation) – applying AI/ML to geospatial data analysis.	April 2024 – April 2025
