SUMMARY

Data Scientist with ~1 year of experience turning data into business impact through statistical modeling, machine learning, and predictive analytics. Recognized as “Rookie of the Year 2025” at Keywords Studios for exceeding all KPIs. Skilled in Python, R, SQL, statistical inference, feature engineering, and end-to-end model development — from exploratory data analysis and hypothesis testing to deploying production models — with a peer-reviewed publication in deep learning.

EDUCATION

K.R. Mangalam University

July 2021 – July 2025

B.Tech in Computer Science and Engineering (Specialization in AI/ML), Gurgaon | Cumulative GPA: 8.5/10

Relevant Coursework: Data Structures & Algorithms, NLP, Computer Vision, DBMS, Machine Learning, Deep Learning

EXPERIENCE

Research Associate – AI, Keywords Studios India – Gurgaon, Haryana

May 2025 – Present

- Designed and delivered 85% of self-generated training datasets to production as the first member of a global team, applying rigorous data quality checks and statistical validation.
- Trained and evaluated Agentic AI models for complex multi-step workflows, using data-driven experimentation and error analysis to improve task-completion reliability.
- Awarded “Rookie of the Year 2025” for surpassing all performance KPIs through advanced modeling, data-pipeline optimization, and cross-functional collaboration.

Artificial Intelligence Intern, Infosys – Remote

November 2024 – February 2025

- Analyzed conversational datasets and engineered features that boosted AI response accuracy by 35% using LangChain and LangSmith.
- Built and validated LLM-driven features that reduced system latency by 25%, quantifying impact with clear performance metrics and dashboards.
- Collaborated with 12 engineers on end-to-end ML workflows and was selected to present at the Best Project by Indian Interns initiative.

Data Analytics & ML Intern, QL2 Software – Gurgaon, Haryana

June 2024 – August 2024

- Built predictive ML models for competitive pricing intelligence and performed large-scale data extraction, cleaning, and statistical analysis to surface actionable insights.
- Translated analytical findings into clear visualizations and recommendations that informed pricing strategy.

PROJECTS

Dynamic Screen Companion

June 2025 – Present

- Built a real-time multi-modal assistant integrating the Gemini API to analyze live screen activity and deliver continuous, context-aware feedback.
- Engineered the end-to-end data and inference pipeline from scratch, reducing manual task time by 40%.
- Optimized OCR pipelines to sustain 95%+ extraction accuracy across varied screen layouts.

Diabetic Optiscan

January 2025 – June 2025

- Led integration of a Vision Transformer (ViT-B/16) on the APTOS dataset, applying statistical analysis of self-attention to capture spatial patterns in retinal images.
- Designed a custom wavelet technique that boosted detection precision by 50% over legacy methods.
- Co-authored a peer-reviewed research paper detailing the methodology and performance results.

Currency Detection App for Visually Impaired

July 2024 – December 2024

- Trained an image-classification model on 200,000+ banknote images achieving 96% accuracy, validated through rigorous evaluation across edge cases.
- Conducted user interviews with visually impaired individuals to ground feature decisions in real-world needs.

SKILLS

Languages & Tools: Python, R, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Jupyter, Git

Statistics & ML: Statistical Modeling, Hypothesis Testing, A/B Testing, Regression, Classification, Clustering, Feature Engineering, Predictive Modeling, Time Series, Model Evaluation & Optimization

Data & Visualization: Data Wrangling, EDA, Power BI, Matplotlib, Seaborn, MySQL, MongoDB, Excel, Statistical Analysis, Experiment Design

AI & Cloud: LLMs, Generative AI, RAG, Deep Learning, NLP, Computer Vision, AWS, GCP (Vertex AI)

CERTIFICATIONS

Ducat India – Data Science Professional Training

April 2024 – April 2025

Professional training in Data Science: Python, statistics, machine learning, data analysis, and predictive modeling.

AI/ML for Geodata Analysis

Offered by ISRO (Indian Space Research Organisation) – applying AI/ML to geospatial data analysis.
